Dear Paul,

Re: Statement of Intent for REACH Implementation

Thank you for your request for details about our REACH compliance status.

The European Regulation on the Registration, Evaluation & Authorisation of Chemicals (REACH) came into force July 2007. Cynergy3 Components Ltd is aware of it's ongoing responsibilities regarding the European Union regulations and we have implemented a process that will ensure we comply fully with the legislation within the timescales laid down. We are continually in communication with our suppliers and believe that we fully comply with the new regulations.

With the introduction of the REACH regulations we also have an obligation to inform our customers of SVHC's (Substances of Very High Concern) along the supply chain. With reference to the ECHA (The European Chemicals Agency) issued list of substances, Cynergy3 Components Ltd does not supply products containing any of the substances currently listed. We will periodically review this list as it is updated by the ECHA.

In consultation with our suppliers we have reviewed our supply chain and do not believe it is under any threat regarding the withdrawal of SVHC substances that would diminish our ability to continue to supply the current product range.

Please contact the undersigned if you have any questions relating to this matter.

Yours sincerely

John Mason
VP Sales & Marketing / Operations
