Environmental Protection / Environmental Management

You procure articles (not chemicals) from us which are not intended to release any substance under normal and reasonable foreseeable conditions of use.

The few chemicals used in the manufacturing process are either registered by our suppliers or do not need to be registered or notified.

As far as we know at present our articles do not currently contain any substances that are listed on the first "candidate list".

The REACH directive 1907/2006/EC (Registration, Evaluation, Authorisation of Chemicals) does not apply to E-T-A products. Therefore we do not require a registration, evaluation or approval to the REACH directive neither do we have to establish a safety data sheet to 91/155/EWG or 67/548/EWG.

E-T-A Elektrotechnische Apparate GmbH

Helmuth John
