To Whom It may Concern,

80/20 Inc. understands the changing needs of our customers due to the pending ROHS (Restriction of Hazardous Substances) compliance requirements, and is working hard to provide these to you as quickly as is possible.

Through our own extensive compliance research and investigation, we have found that the majority of 80/20 products are compliant and have letters of confirmation for each product on file stating that fact. To date, 80/20 has identified only a few products that are not compliant. See the following spreadsheet to view products that do not fall within the ROHS compliancy standards.

80/20's goal is to be 100% compliant, we will revise this listing until we have achieved the 100% compliance status. Be confident that we are working hard to meet the compliance standards for you while maintaining the same high quality and fast delivery you have come to expect from 80/20 Inc.

Sincerely,

80/20 Inc.
