Model 7A Pneumatic Proximity Switch

The GO Switch model 7A is a unique pneumatic proximity switch. The 7A uses reliable leverless limit switch technology to operate a 3 way air valve at up to 100 PSI.

The GO Switch 7A is ideal for use as a cylinder position sensor in pneumatic cylinders, on many types of automated equipment, and in any hazardous areas where electrical signals should be avoided.

Features:
- Pneumatic proximity switch
- 3 way air valve
- 1.5 SCFM nominal flow rate
- Up to 100 PSI operation

### Specifications

- **Model:** 7A
- **Port Arrangement:** Three (pneumatic)
- **Sensing Range:** Three "push to release" fittings (for 5/32" O.D. tubing)
- **Port Position:** Three (pneumatic)

### Dimensions

- **5/16-18 UNF-2A THREADS**
- **1.12" (28mm)**
- **1.88" (48mm)**
- **2.50" (64mm)**
- **ø.935" (24mm)**

### Round Switches

- **Leverless Limit Switches**
- **Enclosure Material Approvals Wiring Options**
