Temperature and Process Controllers
Industry Leading Performance...and Easy to Use

- High Performance, Extremely Versatile
- Easy and Intuitive to Use
- Bright 3-Color (RED, GREEN, and AMBER)
- 9 Segment LED Display with Wide Viewing Angle
- High Accuracy Inputs and Outputs
- Full Autotune PID with Fuzzy Logic Adaptive Control
- Up to 99 Programs with 16 Ramps and Soaks Including Ramp/Soak Events
- Universal Inputs for Thermocouples, RTD’s, Thermistors, and Process Voltage/Current
- No Jumpers to Set, Totally Firmware Configurable
- Automated Configuration Recognition, “Smart” Menu Flow
- Up to 20 Samples per Second with 24-Bit ADC
- Comes with 2 or 3 Programmable Control/Alarm/Retransmission Outputs: Choice of DC Pulse, Solid State Relays, Mechanical Relays, Analog Voltage and Current
- Standard USB, Optional Ethernet and RS232/RS485 with MODBUS® Serial Communications
- Built-In Excitation Firmware Selectable at 5V, 10V, 12V, and 24V
- Full Scale Positive and Negative Readings
- NEMA 4 (IP65) Front Bezel (1/32 and 1/16 DIN) or NEMA 1 (1/8 DIN)
- Analog Remote Setpoint for Cascaded Control
- Remote Latch Reset, Remote Ramp and Soak Start

The PLATINUM Series family of microprocessor-based PID controllers offer unparalleled flexibility in process measurement. While extremely powerful and versatile, great care has gone into designing a product that is very easy to set-up and use. The automatic hardware configuration recognition eliminates the need for jumpers and allows the firmware to automatically simplify itself, eliminating all menu options that do not apply to a specific configuration.

Offered in 1/8, 1/4, and 1/2 DIN sizes, the 1/4 and 1/2 DIN models can be configured with dual displays.

Each unit allows the user to select the input type from 9 thermocouple types (J, K, T, E, R, S, B, C, and N), Pt RTDs (100, 500, or 1000 Ω, with either 385, 392, or 3916 curve), thermistors (2250 Ω, 5K Ω, and 10K Ω), DC voltage, or DC current. The voltage or current inputs are bipolar and fully scalable to virtually all engineering units, with a selectable decimal point that is perfect for use with pressure, flow, or other process input.

Control can be achieved by using the on/off or PID heat/cool control strategy. PID control can be optimized with an auto-tune feature; and in addition, a fuzzy logic adaptive tuning mode allows the PID algorithm to be continuously optimized. The instrument offers up to 16 ramp and soak segments per ramp and soak program, with auxiliary event actions available with each segment. Up to 99 saved programs which can be chained to create up to 1584 discreet segments. Multiple alarms can be configured for above, below, hi/lo, and band triggering using either absolute or deviation alarm trigger points.

The PLATINUM Series device features a large, three-color, programmable display with the capability to change color and/or change the state of designated outputs every time an Alarm is triggered. Various configurations of mechanical relay, SSR, dc pulse, and analog voltage or current outputs are available. Every unit comes standard with USB communications for firmware updates, configuration management, and data transfer. Optional ethernet (1/4 DIN and 1/2 DIN models only) and RS232/ RS485 serial communications are also available. The Analog Output is fully scalable and may be configured as a proportional controller or as retransmission to follow your display. The universal power supply accepts 90 to 240 Vac. The low voltage power option accepts 24 Vac or 12 to 36 Vdc.

Additional features usually found only on more expensive controllers make this the most powerful product in its class. Some of these additional standard features are: remote setpoint for cascaded control set-ups, high/low-low alarm functionality, external ramp and soak program initiation, combination heat/cool control mode, configuration save and transfer, and configuration password protection.

**Embedded Ethernet and Serial Communications**

Optional “embedded ethernet” on the 1/4 and 1/2 DIN models allow the units to connect directly to an Ethernet network and transmit data in standard TCP/IP packets, or serve Web pages over a LAN or the Internet. Optional serial communications are also available configurable as RS232 or RS485, with straightforward ASCII commands or MODBUS®. All three types of communications interfaces (USB, Ethernet, and Serial) can be installed and active simultaneously.

**Specifications**

**INPUTS**

- **Input Types:** Thermocouple, RTD, thermistor, analog voltage, analog current
- **Current Input:** 4 to 20 mA, 0 to 24 mA scalable
- **Voltage Input:** -100 to 100 mV, -1 to 1 V, -10 to 10 Vdc scalable
- **Thermocouple Input (ITS 90):**
- **RTD Input (ITS 90):** 100/500/1000 Ω Pt sensor, 2-, 3- or 4-wire; 0.00385, 0.00392, 0.003916 (100 Ω only), or 0.003916 (100 Ω only) curves
- **Thermistor Input:** 2252 Ω, 5K Ω, 10K Ω
- **Configuration:** Differential
- **Polarity:** Bipolar
- **Resolution:** 0.1° temperature; 10 μV process
- **Input Impedances:**
  - **Process Voltage:** 10M Ω for ±100 mV, 1M Ω for other voltage ranges
  - **Process Current:** 5 Ω
  - **Thermocouple:** 10K Ω max
  - **Auxiliary Input (Remote Setpoint):**
    - 3.5K Ω for 0 to 10V, 50K Ω for 0 to 1V, 50 Ω for current
  - **Temperature Stability:**
    - **RTD:** 0.04°/°C
    - **Thermocouple @ 25°C (77°F):** 0.05°C/°C (cold junction compensation)
    - **Process:** 50 ppm/°C
- **A/D Conversion:** 24-bit sigma delta
- **Reading Rate:** 20 samples per second
- **Digital Filter:** Programmable from 0.05 seconds (filter = 1) to 6.4 seconds (filter = 128)
- **Setpoint Adjustment:** 9999 to 9999 counts

**OUTPUTS**

- **Analog Output:** Non-isolated, Proportional 0 to 10 Vdc or 0 to 20 mA; 500 Ω max; programmable for control or retransmission; accuracy is 0.1% of full scale
- **DC Pulse:** Non-isolated; 10 Vdc at 20 mA
- **SPST Relay:** Single pole, single throw mechanical relay, 250 Vac or 30 Vdc at 3 A (resistive load)
- **SPDT Relay:** Single pole, double throw mechanical relay, 250 Vac or 30 Vdc at 3 A (resistive load)
- **SSR:** 20 to 265 Vac at 0.05 to 0.5 A (resistive load); continuous

**COMUNICATIONS (USB STANDARD, OPTIONAL SERIAL AND ETHERNET)**

- **Connection:**
  - **USB:** Female micro-USB
  - **Ethernet:** Standard RJ45
  - **Serial:** Screw terminals
- **USB:** USB 2.0 host or device
- **Ethernet Standards Compliance:**
  - IEEE 802.3 10/100 Base-T auto-switching, TCP/IP, ARP, HTTP GET
  - **Serial:** Software selectable RS232 or RS485; programmable 1200 to 115.2 K baud
- **Protocols:** OMEGA ASCII, MODBUS® ASCII/RTU

**Isolation**

- **Approvals:** UL, cUL, CE
Power to Input/Output:
- 2300 Vac per 1 min test; 1500 Vac per 1 min test (low voltage/power option)

Power to Relays/SSR Outputs:
- 2300 Vac per 1 min test

Relays/SSR to Relay/SSR Outputs:
- 2300 Vac per 1 min test

RS232/RS485 to Inputs/Outputs:
- 500 Vac per 1 min test

GENERAL

Display:
- 4-digit, 9-segment LED
- Pt32, Pt16 and Pt16D: 10.2 mm (0.40")
- Pt8: 21 mm (0.83")
- Pt8D (Dual Display): 21 mm (0.83") and 10.2 mm (0.40")

Dimensions:
- Pt8 Series: 48 H x 96 W x 127 mm D (1.89 x 3.78 x 5")
- Pt16 Series: 48 H x 48 W x 127 mm D (1.89 x 1.89 x 5")
- Pt32 Series: 25.4H x 48W x 127mm D (1.0 x 1.89 x 5")

Panel Cutout:
- Pt8 Series: 45 H x 92 mm W (1.772 x 3.622”), 1⁄8 DIN
- Pt16 Series: 45 mm (1.772”)sq, 1⁄16 DIN
- Pt32 Series: 22.5 H x 45 mm W (0.886 x 1.772”), 1⁄32 DIN

Environmental Conditions:
- 0 to 50°C (32 to 122°F), 90% RH non-condensing

External Fuse Required:
- Time-Delay, UL 248-14 Listed:
  - 100 mA/250 V; 400 mA/250 V (low voltage option)
- Time-Lag, IEC 127-3 Recognized:
  - 100 mA/250 V; 400 mA/250 V (low voltage option)

Line Voltage/Power:
- 90 to 240 Vac ±10%, 50 to 400 Hz, 110 to 375 Vdc, equivalent voltage
  - *No CE compliance above 60 Hz.

Low Voltage/Power Option:
- External power source must meet Safety Agency Approvals; units can be powered safely with 24 Vac power, but no certification for CE/UL is claimed
  - Pt8, Pt16, Pt32 Models: 4 W power
  - Pt8D, Pt16D Models: 5 W power

Protection:
- Pt32, Pt16, Pt16D Models: NEMA 4X (IP65) front bezel
- Pt8, Pt8D Models: NEMA 1 front bezel

Weight:
- Pt8 Series: 295 g (0.65 lb)
- Pt16 Series: 159 g (0.35 lb)
- Pt32 Series: 127 g (0.28 lb)

Cascade Control
The remote setpoint feature of the PLATINUM Series Controllers can be used in a variety of applications where setpoints can be sent to the controllers from remote devices such as manual pots, transmitters, computers, etc.

This feature can also be used to set-up a “cascade control” system, where the remote setpoint input is generated by another controller.

Figure 1: shows a generic diagram of a cascade control system

Ranges and Accuracies for Supported Inputs

<tr>
<th>Pt Series Features—Functionality</th>
<th>Vs Competition</th>
<th>Benefits</th>
</tr>
</thead>
<tbody>
<tr>
<td>2 or 3 Programmable Control/Alarm/Retransmission Outputs: Choice of DC Pulse, Solid State Relays, Mechanical Relays, Analog Voltage and Current; Flexible Configurability, can program multiple outputs for all modes</td>
<td>One of the best, some have more available output channels but with less programming flexibility.</td>
<td>This level of configurability and flexibility allows these units to be used for a broad range of applications. In addition, for applications where setup reconfiguration occurs often, such as laboratory research, this capability is critical.</td>
</tr>
<tr>
<td>Standard USB Host Mode Communication on All Models; Firmware Updates, Configuration and Data Transfer, and PC-based Control</td>
<td>One of the best, only a few have USB and these don’t support host mode.</td>
<td>Almost all of today’s PC’s have USB ports but few of them have serial communications. USB memory sticks can be used to replicate firmware configurations without a computer connection.</td>
</tr>
<tr>
<td>Optional Ethernet (⅓ and ½ DIN models) and RS232/RS485 Serial Communications, MODBUS® Available.</td>
<td>Simultaneous communications make it one of the best.</td>
<td>Serial comms are still important for connecting with PLC’s in process control applications. Ethernet enables enterprise connectivity.</td>
</tr>
<tr>
<td>Remote Setpoint for a Variety of Remote Sensing Applications and also Cascaded Control.</td>
<td>One of the best, few have it and usually charge extra.</td>
<td>The other side of cascade control. Also useful when the control setpoint is dependent on a remote measurement.</td>
</tr>
<tr>
<td>Alarm Programmability: Above, Below, In-Band, or High-Low, All with Absolute or Deviation Referencing, All with High-High Indication, Digital Input Latch Clear.</td>
<td>Best in class in terms of programmability and flexibility.</td>
<td>Alarm functionality is important across all applications. The flexibility offered here is augmented by the communications choices available.</td>
</tr>
