

Introducing the The Valueline 3 (VL3) industrial PCs

JULY 2023

Description

The new Valueline 3 (VL3) from Phoenix Contact offers reliable hardware with significantly increased performance over previous generations in a cost effective design.

What makes the product unique?

- Intel's Long-Term Roadmap CPUs provide 7 to 15 years of availability.
- Assembled in the US providing short lead-times.
- Industry leading warranty, 2 years out of the box, extended 5 year with power supply and surge protection.
- Ability to configure hardware based on application needs.
- Future proof security with built in Trusted Platform Module (TPM 2.0).
- World class support with Phoenix Contact subsidiaries all around the world.

Features and customer benefits

VL3	Key FUNCTIONALITY
DisplayPort++	Supports displays with up to 4K resolution and multiple displays streaming over a single connector
Dual m.2 SSD storage options	Additional drive capabilities allows more storage capacity, as well as RAID 1 for higher data integrity
VESA mounting	VESA mounting allows industrial panel PCs to be fastened in a modern style
TPM 2.0 (Trusted Platform Module)	Local on board encryption device, providing secure boot capabilities and other possibilities (future softwares will require this module)
10-point projective capacitive touch	Provides the customer with more creation capabilities with a sublime user interface – also can be used with gloves
11th generation Core-I chipsets	Modern CPU chipsets allow you to build long-term solutions with energy-efficient designs, and provide increased computing at a lower cost
